

## CommandBarControls

The *CommandBarControls* collection describes instances of **CommandBarControl** objects present in a **CommandBar**. tags: [Collections](#)

### Syntax

```
commandbar.CommandBarControls()  
commandbar.CommandBarControls(index)  
commandbar.Controls()  
commandbar.Controls(index)
```

Argument #1	Type	Returned value
	absent	A <b>Collection</b> object
index	integer long	A <b>CommandBarControl</b> object corresponding to the index-th item in the <i>CommandBarControls()</i> collection. The 1st control is <i>CommandBarControls(0)</i> , the 2nd is <i>CommandBarControls(1)</i> and so on ... The last one has as index <i>CommandBarControls.Count - 1</i> .

### Remarks

- The *CommandBarControls* collection can not be browsed by name.
- An error message will be raised if the *CommandBar* is the status bar (name = "statusbar") or if the *CommandBar* is hidden.

### Error messages

Argument nr. 1 [Value = '...'] is invalid
Out of array range or incorrect array size
Action not applicable in this context
