Applies to ...

Object	Description
DoCmd	Root class. When present, its name must be " DoCmd " but the object name is optional.

Syntax

[**DoCmd**.]**MoveSize**([*Left*] , [*Top*] , [*Width*] , [*Height*])

Argument	Optional	Type	Description	Returned value
Left	Yes	Integer Long	The screen position for the left edge of the window relative to the left edge of the screen	True if success
Top		Integer Long	The screen position for the top edge of the window relative to the top edge of the screen	
Width		Integer Long	The desired width of the window	
Height		Integer Long	The desired height of the window	

Remarks

- The action applies to the active window. A window may be made active with the **SelectObject** action.
- The *MoveSize* action is also applicable to the Basic IDE window or the database window. However it will ignore any window opened by another application than the one having called the *MoveSize* action..
- The *MoveSize* action applies to **forms** or **dialogs** only.

Error messages

Argument nr. ... [Value = '...'] is invalid
